PROFILE

Second-year Information Technology student at Inholland University of Applied Sciences with hands-on experience building full-stack applications using C#, ASP.NET MVC, PHP, JavaScript, and Vue.js, backed by SQL and NoSQL databases. I enjoy turning real requirements into working, user-friendly software — from Figma prototypes to backend systems — and combine my studies with a customer-facing role that has sharpened my communication and reliability. Seeking a back-end, front-end, or full-stack development internship starting September 2026.

TECHNICAL SKILLS

Languages & Frameworks: C#, ASP.NET MVC, PHP, JavaScript, Vue.js, HTML5, CSS3

Databases: MS SQL Server, MySQL (SQL) · MongoDB (NoSQL)

Cloud & Tools: Microsoft Azure, Git & GitHub, Docker, REST APIs, Figma

Practices: Object-Oriented Programming, Agile/Scrum, responsive web design, UI/UX prototyping

TECHNICAL PROJECTS

Jetto — Inventory Management System

Sep 2025 – Nov 2025

PHP, MySQL, JavaScript, Docker · Personal project

- Built a full inventory management system in plain PHP with an MVC-style structure — controllers, models, views, and a repository/service layer for products, stock movements, and users.
- Implemented core inventory features: product and category management, stock quantity updates, and tracking of sales, purchases, waste, and adjustments, plus a dashboard summarizing totals and recent activity.
- Added user authentication (login, registration, logout, password reset) with hashed passwords and secure, httpOnly/SameSite session cookies, and containerized the app with Docker for local setup.

Chapeau — Restaurant Ordering System

Apr 2025 – Jun 2025

C#, MS SQL Server, Figma · Inholland academic project

- Designed the full UI/UX in Figma, then developed a complete ordering system covering table management, order flow, and kitchen/bar views.
- Implemented database design and CRUD functionality in C# with MS SQL Server, focusing on data integrity and fast lookups.

GitHub: <https://github.com/Rakib730066/Chapeau-ordering-system/tree/Developer>

Someren Database Project

Feb 2025 – Apr 2025

C#, MS SQL Server · Inholland academic project

- Built a management application to organize activities, participants, and supervisors for a residential program.
- Implemented a layered architecture (UI, service, and data-access layers) to keep the codebase maintainable and testable.

GitHub: <https://github.com/Milen714/Database-Project-1A-Group4>

Haarlem Festival — Multi-Event Website

Mar 2026 – May 2026

PHP, MySQL, HTML5, CSS3, JavaScript, Figma · Inholland group project

- Built the “Stories” event section of a dynamic festival website in PHP, taking it from Figma prototype to working web pages.
- Designed the MySQL database schema and wrote the queries powering event listings, filtering, and the ticket booking flow.
- Developed responsive frontend pages with event cards and age-based filtering, refined through documented usability testing.

WORK EXPERIENCE

Front Desk Receptionist — The Times Hotel, Amsterdam Sep 2024 – Present

- Manage guest check-ins, check-outs, reservations, and payment processing with accuracy and a welcoming, professional manner.
- Handle phone, email, and third-party platform enquiries (e.g. Booking.com) in English, while ensuring the safety and security of guests and the premises.

EDUCATION

BSc Information Technology — Inholland University of Applied Sciences, Haarlem, Netherlands
2024 – Present

LANGUAGES

Bengali (native) · English (C1 reading, B2 speaking/writing) · Hindi/Urdu (basic)
